

TARA

Tax, Assets & Residency Advisor

Rule-heavy systems don't just exist to be searched. They govern.

Hrishita Bapuram

Rules are public. **Relevance is private.**

Cross-border personal compliance fails in a specific, boring way. Nobody is confused about the headline rule. What goes wrong is that a rule quietly moved, and nothing downstream noticed.

THE CURRENT STATE

Regulators publish correctly and completely, then assume you'll notice when something changes and work out whether it was about you. Globally, that averages **200 regulatory changes a day**.

Most people can't — so they either pay a professional, or find out too late.

The Sharpest Version

Holding assets across two countries, where obligations fire by calendar date and nothing notifies the holder.

Each side keeps its own paperwork. Nothing keeps all three at once — let alone for the holder.

This isn't a niche problem. It's 304 million people.

304M

People living outside their birth country in 2024 — growing three times faster than the world population.

130,000+

People from the Indian subcontinent in Ireland today, up from ~95,000 at the last census.

220 / day

Regulatory alerts the average compliance team has to track globally.

\$112.1B

Forecasted global RegTech market by 2033 (21.1% CAGR).

Nearly 40% of businesses call compliance burden their single biggest challenge (Deloitte, 2026) — and unlike a business, a person has no compliance department to carry it.

Sources: UN DESA/MPI • CSO Ireland & The Burkean • Thomson Reuters Cost of Compliance • Grand View Research

An LLM coordinates the work. TARA keeps the decision safe.

The LLM uses MCP to discover the source and case. TARA's deterministic controls validate the rule, date, calculation, and evidence.

Nine agents behind one protocol.

The LLM discovers 12 guarded MCP tools.

OPEN BAND (COMPUTED ONCE)

SURVEY	Monitors the source text and detects what changed.
LEGEND	Decomposes the change into cited obligations.
ALMANAC	Versions the obligations into a source-linked graph.

TENANT BAND (PER HOLDER)

COMPASS	Determines if the obligation applies to this person.
PLOT	Checks which duties trigger, including dates and thresholds.
COURSE	Opens a dated action for the holder.
ANCHOR	Verifies the submitted evidence exactly.

MERIDIAN repeats the Tenant Band across eligible linked jurisdictions and corridors.

ATLAS records every step in a hash-chained ledger. Nothing edited, nothing deleted.

The same architecture scales to the enterprise. From personal holdings to corporate controls.

SMEs and regulated teams receive long legal updates but struggle to determine exactly which products, processes, contracts, or training must change. The TARA engine maps the same way.

THE PROTOTYPE: PERSONAL COMPLIANCE

- **Source:** Revenue / CBDT / FinCEN
- **Context:** Citzenships, tax residencies, personal assets
- **Obligation:** File a return, pay a tax, disclose an account
- **Action:** Owned by the individual or their advisor
- **Evidence:** Tax computation, filed return receipt

THE EXTENSION: ENTERPRISE REGTECH

- **Source:** EUR-Lex, Statutory Instruments, Regulator Guidance
- **Context:** Business lines, operating jurisdictions, product types
- **Obligation:** Update a policy, change a contract, retrain staff
- **Action:** Assigned to a specific control owner with a deadline
- **Evidence:** Signed policy, training log, updated contract clause

Extensibility proven by covered packs. **Nine packs loaded today.**

The same pipeline runs nine domain packs today. Adding a new covered obligation is configuration work, not new agent code.

DOMAIN PACK	SOURCE FAMILY	OBLIGATION TYPE	STATUS
Ireland Tax	Revenue Commissioners	8-year deemed disposal (Offshore Funds)	Tested path
Ireland CGT	Revenue Commissioners	Property disposal & PPR relief	Exploratory
Ireland IRP	Immigration Service Delivery	Immigration registration & renewal	Exploratory
India FA/FSI	CBDT / Income Tax Dept	Foreign asset & income disclosure	Exploratory
US FBAR/FATCA	FinCEN / IRS	Foreign account & asset reporting	Exploratory
India NRI Securities	CBDT / Income Tax Dept	Listed-securities capital gains	Exploratory
India-Ireland Corridor	RBI FEMA / DTAA	NRO redesignation & Treaty relief	Exploratory
India-US Corridor	RBI FEMA / DTAA	NRO redesignation & Treaty relief	Exploratory
Ireland-US Corridor	DTAA	Foreign Tax Credit relief	Exploratory

The core stays open. That's what makes it worth building on.

OPEN — THE MCP CORE

- Sourced straight from public regulatory text — Revenue, CBDT/RBI, FinCEN/IRS.
- **SURVEY, LEGEND, ALMANAC** — the agents that build the Chart.
- Free and transparent. Pretending public rules are proprietary is a credibility problem, not a moat.

MONETIZED — THE PERSONALIZATION LAYER

- **COMPASS, PLOT, COURSE, ANCHOR** — the agents that do per-holder work.
- **Beachhead buyer:** Cross-border tax advisory practices.
- Sold to tax & accounting firms, relocation services, and wealth managers who need to triage client facts efficiently.

CAVEAT: We do not claim validated buyers, LOIs, or enterprise traction. The architecture is a platform candidate; the immediate goal is securing the first source-reviewed pilot.

Working prototype now. The next proof is in the market.

Today: 112 passing tests, 8 acceptance checks, 9 packs, and a live LLM/MCP path. We are seeking one domain reviewer and one cross-border advisory team to co-design a controlled pilot.

Day 30

Source Governance

Formalize the ingestion pipeline. Move from snapshotted source texts to live monitoring of Revenue and CBDT endpoints with automated diffing.

Day 60

Reviewer Workflow

Build the human-in-the-loop interface. Ensure every generated action and evidence check can be audited and signed off by a qualified professional before finalization.

Day 90

Hosted Integration

Deploy the MCP server as a secure, multi-tenant HTTP service, allowing a pilot partner to query the tenant band via API using their own client data.

Day 120

Validated Pilot

Execute a closed beta on one specific corridor (e.g., India-Ireland) with a tax or relocation firm, measuring time saved on initial compliance triage.

Demo-ready. Audit-ready next.

The screenshot displays the TARA LIVE DEMO interface. On the left is a sidebar with a list of steps: 'Choose case', 'Case facts', 'Assets', 'Source chart', 'Parallel scan', 'One question', 'Playbook', 'Check proof' (highlighted with a pink background and a question mark icon), and 'Audit trail'. The main area is titled 'LIVE ENGINE' with a unique ID. It shows 'STAGE 7 · ANCHOR · THE PART THAT SAYS NO' with the instruction 'Submit the proof and see whether it holds'. Below this, a paragraph explains that ANCHOR checks artefact types, required fields, and rates. A dropdown menu asks 'Which action are you closing?' and is set to 'OBL-002B — HLD-101 · tax · due 2026-07-01'. At the bottom, a table lists artefact types and their required fields.

artefact_type	tax_computation
required	rate_applied, computed_tax

APPENDIX

Architecture snapshot

Source and claim register

PRIMARY SOURCE	VERIFIED CLAIM	SCOPE LIMITATION / CAVEAT
Tax and Duty Manual Part 27-04-01 & 27-01A-02 Revenue Commissioners (Ireland) · Jan 2026	For a non-PPIU interest within Ireland’s equivalent offshore-fund regime, an 8-year deemed disposal applies; the income-tax rate is 38% for disposals on or after 1 Jan 2026.	Applies to equivalent EU/EEA/OECD funds. PPIUs remain subject to a 60% rate.
Capital Gains Tax (CGT) Overview & Payment Revenue Commissioners (Ireland) · Aug 2026	CGT is payable on gains from land/buildings at 33% for most gains. Payment is due 15 Dec (for Jan-Nov disposals) or 31 Jan. Return due 31 Oct next year.	PPR Relief is conditional on occupation and restricted for development value.
Master Direction – Deposits and Accounts Reserve Bank of India · Sep 2026	When a resident Indian becomes a person resident outside India, their existing resident account should be designated as an NRO account.	FEMA residence is a separate legal test from tax residence. NRO is not tax-free.
India–Ireland Convention (Synthesised Text) Income Tax Dept, India · MLI in force 2019	Provides an Irish foreign-tax credit mechanism for Indian tax payable in accordance with the Convention on the same Indian-source profits/gains.	Subject to MLI principal-purpose anti-abuse rules and Article 4 tie-breakers.
International Migrant Stock 2024 UN DESA · Jan 2025	Estimated 304 million international migrants worldwide in 2024 (3.7% of global population).	Estimated stock, not annual flow. Not every migrant creates a compliance event.

Prototype validation

TEST SUITE COVERAGE (112 PASSING TESTS)

- **Date math:** `test_add_years_never_off_by_one` proves deterministic trigger calculation.
- **Band order:** `test_plot_rejects_unconfirmed_holding` proves PLOT raises `BandOrderError` if COMPASS is bypassed.
- **Evidence verification:** `test_anchor_rejects_superseded_rate` proves exact-match rejection (e.g., 30% vs 33%).
- **Supersession:** `test_refresh_reopens_superseded_closures` proves ALMANAC invalidates old evidence when rules change.
- **Cross-jurisdiction:**
`test_corridor_is_confirmed_for_a_holder_matching_both_facts` proves MERIDIAN logic.

LIVE DEMO ARTIFACTS

- **Transcripts:** Full CLI transcripts for two complex holder profiles are committed in `docs/demo-example1-transcript.txt`.
- **ATLAS Ledger:** The demo writes to a real append-only JSONL ledger; `verify_chain()` confirms cryptographic integrity.
- **Fallback:** The `--direct` CLI flag runs the entire pipeline without an LLM orchestrator or API key.

```
$ python -m tara.cli demo
MERIDIAN: cross-jurisdiction survey
